

Stöckli Metall AG – Your System Provider

About us

We are a company specialized in sheet metal forming based in Netstal, Glarus canton, and look back to a corporate history of 135 years. Over these years we have formed sheet, have joined and coated numerous materials.

Our extensive know-how in coating aluminum, magnesium and zinc diecasting products forms the basis of our everyday processes.

Since August 1, 2010, we have been producing at our new site. Thanks to

intensive investments in the technical infrastructure and in new production facilities, we can completely avoid the use of fossil fuels. Compared to our old site, we relieve the environment with 230,000 liters of heating oil per year.

CO₂-neutral production at the following address: Zaunweg 17 in Netstal.

We currently have 50 employees working in various fields.

The company is managed by two shareholders, Armando Beccalotto and

Peter Beglinger, the first being responsible for Sales/ Marketing/ Administration and the latter for Technology and Production. All this ensures short decision-making processes, particularly with investments.

Stöckli Metall AG –
A strong partner.
